We Offer Polymer Standards for RoHS/WEEE Compliance Testing for EDXRF, WDXRF and Handheld Instruments.

The RoHS Directive stands for the “restriction of use of certain hazardous substances in electrical and electronic equipment.” This directive bans placing on the EU market of new electrical and electronic equipment more than agreed levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) Flame retardants. The U.S. and Europe are looking into ways in which to monitor and prohibit certain levels of hazardous substances.

RoHS compliance testing requires the sample to be prepared in such a way that it fits the spectrometer and spectrometer system must be calibrated to comply with the screening requirements.

We also offer polymer standards for the analysis of additives in polyethylene.

We have the flexibility to customize the standards to include different elements and concentrations for both type of polymers.

The standards are provided in powder form or as discs.

Standards are prepared gravimetrically and assayed by WDXRF and validated with European reference material when available.

Product Code						Price Per Set	
PL(PE)9-5E(D)						31mm disc	\$1,850
						40mm disc	\$2,310
PL(PE)9-5E(P)						25 grams	\$1,850
						50 grams	\$2,890
Standard Number	Br Wt%	Cd Wt%	Cr Wt%	Hg Wt%	Pb Wt%		
1	0.0000	0.0000	0.0000	0.0000	0.0000		
2	0.0025	0.0025	0.0050	0.0100	0.1000		
3	0.0400	0.0100	0.0750	0.0075	0.0250		
4	0.0100	0.0125	0.1250	0.0500	0.0050		
5	0.0250	0.0075	0.1000	0.0250	0.1250
